USER JOURNEY MAP / Maya Chen

Maya Chen
I need to understand responsible tech for a class assignment.
Undergraduate Student - Technology and Society

SCENARIO
Maya is an undergraduate working on a class essay about responsible AI. She previously visited the RTS Lab site and is returning to gather material, understand the mission, and find citable sources for her assignment.

KEY EXPECTATIONS
- Find clear, accessible mission info
- Locate real-world examples for her essay
- Find a citable academic paper
- Gather everything before her deadline

STAGES	RECALL AND RETURN	UNDERSTANDING MISSION	FINDING EXAMPLES	GATHERING EVIDENCE	COMPLETING ASSIGNMENT
GOALS	Revisit the RTS Lab website she found previously.	Get a clear, quotable understanding of the lab purpose.	Find concrete, recent examples of the lab work for her essay.	Find a published paper she can cite for academic credibility.	Write and submit her essay using gathered material.
ACTIONS	1. Googles RTS Lab ASU 2. Recognizes the site 3. Clicks to homepage	1. Goes to About page 2. Reads mission and vision 3. Reads core values 4. Takes notes	1. Scrolls News section 2. Sees conference talk and blog 3. Reads blog on AI transparency 4. Takes notes	1. Goes to Publications 2. Scans for relevant titles 3. Downloads or reads abstract 4. Skims introduction	1. Returns to her document 2. Writes essay with references 3. Formats citations 4. Submits assignment
THOUGHTS	I remember this site had good stuff about responsible tech.	I need to explain what this lab does - the mission statement is a good start.	This blog post is actually readable - I can use this in my essay.	If I cite an actual paper, my essay will be stronger.	This lab made it easy to understand - I could explain it to someone else.
PAIN POINTS	1. Site not on first search page 2. Homepage looks different than before	1. About page too long or academic 2. Jargon she does not recognize	1. News shows only headlines 2. Blog posts are too technical	1. Abstract too dense to extract 2. No download link or access path	1. No citation format for blog 2. Extra time formatting manually
EMOTIONS	Purposeful, rushed	Focused, anxious	Relieved, engaged	Determined, overwhelmed	Satisfied, accomplished
TOUCHPOINTS	Google search, Lab homepage	About page, Mission statement, Vision, Core values	Homepage news, Blog post page, News links	Publications page, Pub cards, Abstract, PDF download	Her document, University portal
OPPORTUNITIES	1. Ensure strong SEO for key terms 2. Maintain consistent visual identity	1. Write in clear, accessible language 2. Add tl-plain language summary 3. Keep it to 2-3 sentences	1. Write at varying accessibility levels 2. Add one-sentence summaries 3. Include general audience content	1. Add plain-language summaries 2. Make download links visible 3. Reduce clicks to access	1. Include APA and MLA formats 2. Make citations copyable 3. Add citation on blog posts

USER JOURNEY MAP / Dr. Amara Patel

Dr. Amara Patel
Is there a collaboration opportunity here?
Associate Professor - AI Security and Ethical Computing

SCENARIO
Dr. Patel is preparing a grant proposal and keeps finding RTS Lab citations. She wants to evaluate whether there is meaningful research overlap and identify opportunities for collaboration such as co-authored papers or guest talks.

KEY EXPECTATIONS
- Confirm research alignment with her focus
- Evaluate publication quality and recency
- Identify key collaborators at her level
- Find a clear path to initiate outreach

STAGES	DISCOVERY	RESEARCH ALIGNMENT	PUBLICATION QUALITY	IDENTIFYING PEOPLE	INITIATING OUTREACH
GOALS	Identify the lab behind repeated citations in her grant review.	Check if research areas overlap with AI security and ethical computing.	Evaluate venues and confirm the lab is currently active.	Find the director and researchers with overlapping interests.	Send a targeted email proposing a joint paper or guest talk.
ACTIONS	1. Follows citation trail 2. Lands on RTS Lab site 3. Scans homepage quickly	1. Goes to Research Areas menu 2. Scans research streams 3. Reads project descriptions	1. Goes to Publications 2. Sorts by most recent 3. Checks CHI, FAccT, IEEE 4. Skims 3 abstracts	1. Navigates to Members 2. Finds director and 2 PhDs 3. Reads bios and pub lists 4. Looks for collab info	1. Goes to Contact page 2. Notes director email 3. Drafts specific message
THOUGHTS	This work keeps showing up in my citations - I should look into it.	Do they cover security, or is this purely ethics? How close is this?	Where are they publishing? Is the latest paper current? Would a joint submission work?	Who would I work with? Are there peers at my level or just students?	I want this to feel peer-to-peer, not a cold pitch.
PAIN POINTS	1. Citation links to old or generic department pages	1. Vague or overly broad descriptions 2. No specific project examples	1. No sort by date option 2. Venue names hidden 3. Most recent paper is old	1. Profiles lack research interests 2. No mention of external collab	1. Only a generic contact form 2. No preferred contact method
EMOTIONS	Professionally curious	Focused, evaluative	Critical, strategic	Strategic, hopeful	Confident, deliberate
TOUCHPOINTS	Academic paper, Citation link, Lab homepage	Nav bar, Research Areas page, Stream pages	Publications page, Sort/filter options, Pub cards, PDFs	Members page, Profiles, Research tags	Contact page, Director email, Contact form
OPPORTUNITIES	1. Ensure papers link to current site 2. Maintain consistent branding	1. Add specific project examples 2. Show cross-disciplinary links 3. Mention methodologies used	1. Default sort to most recent 2. Display venue names on cards 3. Add New badges on recent pubs	1. State lab welcomes collaborators 2. Link to Scholar or ORCID 3. Show external collab history	1. Provide direct faculty emails 2. Add Collaborate With Us section 3. Outline partnership process

USER JOURNEY MAP / David Okafor

David Okafor
Does this lab's work align with my dissertation?
PhD Student - AI-Driven Automation Research

SCENARIO
David is a PhD student researching AI-driven automation and worker decision-making. He encountered a citation from the RTS Lab in his literature review and wants to evaluate the lab's research relevance, quality, and potential for

KEY EXPECTATIONS
- Find relevant, recent publications in his area
- Verify academic quality and venue credibility
- Identify active researchers for collaboration
- Easily contact the right person

STAGES	DISCOVERY	EVALUATING RESEARCH	ASSESSING QUALITY	IDENTIFYING PEOPLE	MAKING CONTACT
GOALS	Find the source of a citation from his literature review.	Determine if publications align with his dissertation topic.	Verify methodology and publication venues meet academic standards.	Find researchers behind papers and assess collaboration fit.	Send an informed collaboration proposal to the lab director.
ACTIONS	1. Reads paper on Google Scholar 2. Notices RTS Lab citation 3. Clicks author profile link 4. Finds lab website URL	1. Skips here section 2. Clicks Publications nav 3. Uses topic filters 4. Scans titles and dates	1. Opens two relevant papers 2. Reads abstracts and methods 3. Checks journals and conferences	1. Notes author names 2. Navigates to Members page 3. Reads bios and research focus 4. Checks active status	1. Goes to Contact page 2. Finds lab director email 3. Drafts message referencing papers
THOUGHTS	This paper references interesting work - let me see who is behind it.	Are they publishing in my area? Is this recent work or old stuff?	Are these peer-reviewed? Reputable venues? Rigorous methodology?	Who wrote this? Are they still at the lab? Is their focus close enough?	I want to come across as someone who has done the homework.
PAIN POINTS	1. Google Scholar links may lead to outdated or broken pages	1. Filters missing or too broad 2. No visible publication dates	1. Papers not linked, only titles 2. No DOIs or PDFs available 3. Venue names missing from cards	1. No active vs. alumni distinction 2. Generic or missing bios 3. No research focus listed	1. Only a generic form, no email 2. Unclear who handles research inquiries
EMOTIONS	Curious, focused	Analytical, impatient	Critical, evaluative	Hopeful, cautious	Motivated, nervous
TOUCHPOINTS	Google Scholar, Citation link, Lab website URL	Nav bar, Publications page, Filter tags, Pub cards	Publication detail pages, PDF and DOI links, Journal names	Members page, Member profiles, Active/alumni labels	Contact page, Email address, Contact form
OPPORTUNITIES	1. Keep Google Scholar profiles up to date 2. Link directly to current website	1. Add clear topic filters 2. Show dates prominently 3. Show count per category	1. Include venue names on cards 2. Offer downloadable PDFs 3. Add DOI links directly	1. Label current vs. alumni 2. List research interests 3. Link to Google Scholar profiles	1. Provide direct email addresses 2. Welcome collaboration inquiries 3. Add FAQ about joining
