SUMMARY

Multidisciplinary designer with a dual background in Computer Science and Visual Communication Design, focused on human-centered and AI-supported product experiences. Experienced in UX research, prototyping, and interface design, with a strong interest in how people interact with intelligent systems and how complex technology can be made clear and usable.

EDUCATION

M.S. in Human Computer Interaction Arizona State University, College of Integrative Sciences and Arts	08/2025 – 06/2027 (Expected)
B.S. in Computer Science and Engineering Sabancı University, Faculty of Engineering and Natural Sciences	09/2020 – 06/2025
B.A. in Visual Arts & Visual Communication Design (Double Major) Sabancı University, Faculty of Arts and Social Sciences	09/2020 – 06/2025

TECHNICAL SKILLS AND CERTIFICATION

Design & Research: UI/UX Design, Human-AI Interaction, AI-Supported Product Experiences, User Research, Wireframing, Prototyping, Heuristic Evaluation, Interaction Design, Usability Testing, Information Architecture, Visual Systems, Accessibility, Design Thinking, Human-Computer Interaction Principles

Visual & Creative Tools: Figma, Illustrator, Photoshop, InDesign, After Effects, Lightroom

Technical Skills: HTML, CSS, JavaScript, Unity, Python, C++, Java, Frontend Development

PROFESSIONAL EXPERIENCE

Human-Computer Interaction Lab — Research Assistant , Sabancı University	01/2023 – 06/2025
- Designed and evaluated digital and VR interfaces through usability testing and iterative prototyping - Conducted qualitative UX research, synthesized findings into actionable insights, and supported academic publications - Structured and redesigned the lab website with accessibility and information architecture principles in mind - Contributed to research exploring immersive technologies and human interaction in emerging digital environments	
Graphic Design Intern , WE2	06/2024 – 08/2024
- Designed data-driven infographics and visual communication systems for print and web - Translated complex information into accessible, user-centered visual narratives - Developed interactive web components using HTML, CSS, and JavaScript - Supported UX prototyping, layout systems, and content structuring across digital projects	
IT/Data Intern , Danone	07/2023 – 10/2023
- Developed SAP/ABAP automation solutions to improve operational efficiency and system consistency - Standardized backend processes to improve data reliability across merging organizations - Collaborated with cross-functional teams to align technical systems with business needs	
Website Design Intern , Monovi Information Technology	02/2021 – 03/2021
- Redesigned company website using Figma and HTML/CSS with a focus on usability and brand clarity - Delivered responsive UI aligned with user expectations and business objectives	
Assistant , Gate27	05/2020 – 07/2020
- Organized and curated digital visual content for public-facing platforms - Supported creative programs and coordinated communication assets for guest artist initiatives	

PROJECTS

VR Biology Lab - UI/UX + Interaction Design (Unity)

- Designed and implemented interactive VR lab environment enabling multiple users to perform biological procedures in virtual space. Created UI elements based on HCI principles, prototyped interactions, and conducted usability testing with student participants.

Human-Computer Interaction Lab Website - UX + Frontend

- Designed, developed, and deployed a responsive research lab website using Figma prototypes and HTML/CSS. Improved navigation clarity and streamlined access to research documentation and publications.
